HOPE...

Hope for Families partners with church groups, community groups, schools and social service agencies to provide parent education, family support and professional counseling. Materials and resources are tailored to meet the growth needs of each unique group and individual.

HOPE FOR FAMILIES PROVIDES:

A Caring Team of Professionals

Hope for Families professionals are dedicated to providing compassionate care to children and families in distress.

Professional Counseling

Licensed counselors are available to work with individuals, couples, families, adolescents, and children.

Parent Education

Engaging and practical trust-based parent education highlights the need for a delicate balance of structure and nurturing.

Family Support

Short-term support is available to families that need additional help in applying the trust-based parenting principles of connecting, empowering, and correcting in daily life.

Our hope for the families we serve is that parents would be gently led by the LORD as they love and care for the children HE has entrusted to their care.
